Cybersecurity Services

Our Solutions

Elteni provides several cybersecurity services to meet your current and future needs. Looking for a trusted advisor that has an interest in your business and genuinely cares about protecting you from cybersecurity threats? Reach out and let us tell you how we can help.

Assessments

Having trouble identifying privacy and cybersecurity risks that your business faces? We can identify risks, prioritize, and help remediate them.

Regulatory Gap Analysis

Want to meet the regulatory requirements, but not sure where to start? We help you navigate the complexities of how to comply.

Vulnerability Analysis

Unaware of the vulnerabilities that could be putting you at risk? Let us find them before the bad guys do.

Penetration Testing

More than a vulnerability assessment. Find out if, and what sensitive assets can be compromised by ethical hackers.

Policies and Plans

Uncertain what policies and plans you need? We can develop policies you can comply with and plans you can follow.

Training

Your employees are your first line of defense so let us educate them with the knowledge they need to help prevent cyber threats.

Public Cloud Assessments

Using AWS, Azure or Google? We provide audits and assessments of the security posture.

Interactive Training

We provide live demonstrations of wireless attacks, computer-hacking and social-engineering.

Domain Monitoring

Your domains pose a huge risk if comprised. We monitor your domain records and also keep an eye out for similarly registered domains.

VISA Program

Tired of those mundane tasks? Our Virtual information Security Assistant program provides the supplemental support you need.

Insider Threat Analysis

Do you have intellectual property that is extremely sensitive? Afraid you have a nefarious insider in your network? Let us tell you if you do.

Privileged Access Evaluation

Do you know if administrators are abusing their power? Want to keep an eye on them but need to know what to look for? We can show you!

Vendors

Need to strengthen your process to ensure you have good oversight? Are your vendors practicing good security hygiene? We enhance your program and can help with diligence too.

Cybersecurity exercises

Do you have a solid incident response plan? We test your ability to respond to cyber incidents via simulated exercises. Use the knowledge gained from the exercises to strengthen your plans.

Social Engineering

Can you or your employees spot the phish, vish (voice phishing), or smish (text-messaging)? We can complete these tests to identify how well you or your employees perform.

Architecture Design

Having trouble identifying the solutions? Want to make sure the puzzle pieces all fit and work together? We can engineer and architect solutions that fit your needs.

Incident Response

Dealing with cybersecurity incidents can feel overwhelming. We can provide you the technical and operational support needed to recover from them.

BCP/DR

Are you certain your business continuity and disaster recovery plans are effective? Did you know they are two different things? Let us help you ensure your business is protected.

ABOUT US

Elteni helps businesses defend against cyber threats, protect data and reduce security risks. Our advisory and consulting services provided by a team of technologists, security experts, ethical hackers, privacy and compliance professionals enables businesses to transform the way they manage their information security and compliance programs.

Elteni provides high-touch cybersecurity services to various verticals, with a specific focus in the financial services industry. Elteni employees are deeply experienced with technology and cybersecurity governance, risk, and compliance having worked as technologists and information security professionals, and advisers, for small and medium-sized businesses to publicly traded firms. Elteni's unique approach to engaging with clients provide the flexibility they need with a true partner. Elteni's services include but are not limited to privacy and risk assessments, public cloud assessments, portfolio company cyber diligence, regulatory gap analysis, vulnerability analysis, penetration testing, virtual information security assistance, vendor management and diligence, cyber awareness and training, security architecture and design, policies and procedures, and incident response.

Elteni employees are certified privacy, technology, and security professionals holding respected industry certifications from (ISC)², ISACA, EC-Council, CREST LTD, Offensive Security, SANS, IAPP, Cisco, Microsoft, Amazon, Sophos, and are also members of several security communities and information sharing networks such as Infragard, OWASP, FS-ISAC, B-Sides, etc. Elteni employees also have relationships with agencies such as the FBI, DOJ, CISA, and DHS. We maintain strategic relationships with other security vendors, privacy and compliance consulting firms. This ensures we have the latest information to keep our clients informed of the most recent regulatory requirements and security threats.
